As of 2015 there is no available build of Windows 2000 on VirtualBox from Oracle, though it is there for Windows 7. As of 2015 there is no available build of Windows 2000 on VirtualBox from Oracle, though it is there for Windows 7. As of 2015 there is no available build of Windows 2000 on VirtualBox from Oracle, though it is there for Windows 7. [ Windows 2000 Server installation virtual machine In 2009 an article on Inside Windows explained about Microsofts own support decision to stop supporting Windows 2000. At this time the company suggested two possibilities for computer users who still wanted to use this operating system: either to use a VM, or to use a boot disk. These solutions are fully supported by Microsoft, so there is no need to go through a complicated process of "porting" Windows 2000 to a more modern operating system. Windows 2000 Server installation virtual machine. 10.5GB file. no additional software included. Guest additions not installed (but must be added). In case of problem please check with Microsoft Customer Support (support.microsoft.com) that there is no license problem. The guest additions are not installed by default on all servers, therefore if you find that the guest additions are not activated after you install Windows 2000 then you have to activate it manually in the VBoxManage utility. The GUI for activation is available in the Server VirtualBox appliance if you have Windows 2000 installed as a server. Win 2K Server 2003 Server "Install Win2K.zip" 10.5GB, file. no additional software included. Window 2K Server 2003 is also an supported guest OS on VirtualBox. The file is a "zip" file. You can use the Winzip utility to extract the file to get a file folder. Note: If you use "Winzip" to extract the file and do not select "Verify" check box on the "Win2K.zip" file then you will get a warning message telling you that you have an "unsafe" file. To prevent this warning from occurring, you will need to check the "Verify" box, though I have found in practice it does not matter. For a list of OSes supported on VirtualBox follow this. Windows 2000 VDI file for VirtualBox. 10.7GB file. no additional software included. Guest additions not installed (but must be added 2d92ce491b
