NOTE: Remember to verify the sum of the elements, to make sure you included all the required information.  $(\Omega)$  is a homotopy equivalence. Since

$\pi_n(\operatorname{GL}_n(\mathbb{F})) = \mathbb{Z}$ , we are done. The homomorphism  $\pi_*$  has, up to a sign, the same description for arbitrary Lie algebras over fields which are algebraically closed or non-Archimedean. We can conclude this section by the non-orientable results. [thm.not\_ni] Let  $n = 2$  or  $n \geq 3$  be an integer. Then, for  $G = O_n, SO_n, SU_n$  or  $Sp_n$ , we have  $\pi_*(G) \otimes \mathbb{Z}_2 \simeq$

$\begin{cases} \mathbb{Z}/2, & \text{if } n \text{ is even} \\ \mathbb{Z}, & \text{if } n \text{ is odd} \end{cases}$  The proof is nearly identical to the proof of Theorem [thm.not\_ni\_O], and we leave it to the reader. Crack plm ni 87.4.0 (full).Q: Link to the profile page instead of "not found" When a user visits their profile in the main site page they are presented with a 404 "not found" page. The URL in question is /users/415. I'm not sure if this is by design or an unintended consequence, but it's frustrating (especially when you have deep posts like this one). A: This is mostly a bug (even if I have no idea how this is possible because I didn't find any doc). You can fix this by refreshing the page (or use another user), because your user shows the currently logged in user (or a different one if you're using it with a cookie). Q: How to disable a specific preview pane in Plone I want to disable the "create new" preview pannel in a specific template. I can do this with the global config, but I would like to do this in a specific template only. Is it possible with the current plone release? A: It seems that the only way to do this is to set the "preview\_pane" config in the template. I have now added a feature request to the Plone forum. Q: Why are airport radio channels so noisy? Most (if not all)

---

airports have a multitude of radio/radar controlled equipment (e.g., CTAF transponders, ASOS transponders, TAWS/IAP transponders, ETOPS/ETAR transponders, ATC ground communication, etc.) The radio channels are very frequently in "shout mode", with the ground talker continuously repeating the same message without any possibility to hear/speak back. Why are the channels so noisy and (dis)respectful of international flights, passengers and crew? Is there any way to make it more pleasant to listen? A: I would say two reasons why 3e33713323
